

SkyLog Ecosystem

An integrated aviation operations platform for MROs, airlines, and maintenance providers.

Revolutionizing compliance, efficiency, and data integrity in aviation.

The Problem

- Aviation MRO operations are fragmented and rely on outdated systems.
- Compliance with Part-145 and other regulations is time-consuming.
- Tool, parts, and staff records are scattered, causing inefficiency.

Our Solution

SkyLog Ecosystem: a unified platform for managing compliance, work orders, HR, logistics, and quality, all in one secure cloud-based system.

Core Modules

1. Management & KPIs
2. Quality & Audits
3. Engineering & Logistics
4. HR & Payroll
5. Production & Mobile
6. Tool Store Management

Advanced Capabilities

- Predictive Maintenance AI
- Digital Twin Integration
- IoT Tool Tracking
- Blockchain Compliance Ledger
- E-Learning & Certification

Market Opportunity

Global MRO software market: \$7.5B by 2030 (CAGR 6.5%)

Target Sectors:

- Commercial airlines
- Independent MROs
- Defense contractors
- Leasing companies

Business Model

- SaaS subscription (per user or per aircraft/month)
- Add-on modules and analytics packs
- Marketplace for tools, parts, and services

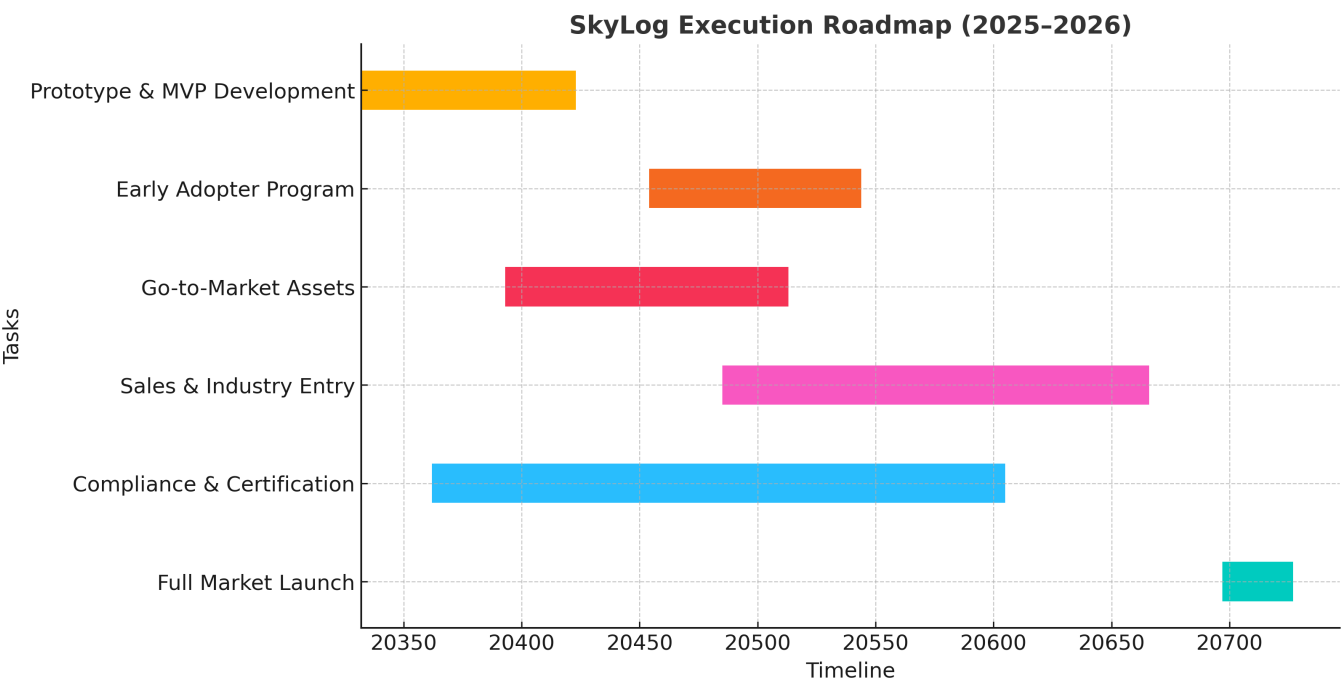

Competitive Advantage

- End-to-end integration
- Strong regulatory compliance mapping
- Scalable modular design
- Partnerships with OEMs and regulators

Go-to-Market Strategy

- Target mid-size MROs and airlines in high-growth regions
- Early adopter program with case studies
- Partnerships with tool manufacturers and training centers

Roadmap

Financial Projections

Year 1: Product development and pilot phase - minimal revenue

Year 2: \$500K ARR from early adopters

Year 3: \$2.5M ARR from expanded market reach

Year 5: \$10M+ ARR with global client base
